

Quizzing Tools

Education

The one place technology beats paper: low-stakes retrieval at scale.

What the tool adds

- Whole-class responses on one screen
- Automatic marking of objective items
- Item-level data on misconceptions
- Spacing scheduled without a paper trail
- Repeat attempts at no marking cost

What to watch for

- Speed scoring rewards guessing
- Leaderboards raise anxiety for some
- Distractors must be real misconceptions
- Recognition is easier than free recall
- The game can crowd out the retrieval

THE DIFFERENCE THAT MATTERS

The effect comes from retrieval. The platform only makes running it cheap enough to do every lesson.

Built on retrieval practice, which is well supported. The platform is not the intervention; the act of recalling without looking is.
