

Parts of a Plant

1st Grade

Roots, stem, leaves, flower — each with the job it does.

FLOWER

Makes the seeds for new plants.

LEAVES

Catch sunlight and make food.

STEM

Holds it up, carries water.

ROOTS

Drink water, grip the soil.

WHAT A PLANT NEEDS

Water

through the roots

Sunlight

onto the leaves

Air

carbon dioxide

Space

room to grow

Leaves use sunlight, water and air to make sugar. That is photosynthesis.
