

Saving and Spending

2nd Grade

Where money goes, and why waiting sometimes gets you more.

Every coin you get can go to one of three places. Decide before you are standing in the shop.

SPEND

1

Something small you want now. Fine — as long as it is a choice.

SAVE

2

Put it aside for something bigger. It takes patience and it works.

GIVE

3

Share some with someone who needs it more.

DECIDE FIRST

4

Split it the moment you get it, not once you are in the shop.

WHY SAVING WORKS

£1 a week spent = a sweet each week

£1 a week saved = £52 and a bike by next year

The thing you want in the shop always feels bigger than the thing you are saving for. It rarely is.
