

Three Kinds of Community

3rd Grade

Urban, suburban and rural — what actually differs between them.

Communities are usually sorted by how many people live in a given space.

Type	What it looks like	Getting around
Urban	city — tall buildings, crowded	bus, tram, train, walking
Suburban	houses with gardens, near a city	mostly cars, some buses
Rural	countryside, farms, few people	cars — long distances

None is better. Each trades space against how close everything is.
