EVERY SQUARE IS FOUR FACTS

$$7 \times 8 = 56$$

$$8 \times 7 = 56$$

$$56 \div 8 = 7$$

...and $56 \div 7 = 8$

To divide, ask a multiplication question: $56 \div 8$ means

"8 times what makes 56?"

Find 8 on the top, run down to 56, then read the row label.
