

Being Safe Online

5th Grade

Six rules that cover almost every situation a ten-year-old meets online.

The internet does not forget, and it cannot tell who you really are.

PROTECT YOURSELF

never share your full name, school or address

keep passwords private, even from friends

tell an adult if anything feels wrong

not everyone online is who they say

PROTECT OTHERS

do not post pictures of people without asking

never say online what you would not say in person

do not join in when someone is being picked on

report it, do not forward it

Before posting, ask: would I be happy for my family and my teacher to see this in five years?
