

The Nucleus

6th Grade

The control centre of the cell.

The control centre of the cell. It holds the DNA and decides what the cell makes and when.

FOUND IN
plant and animal

- Contains chromosomes made of DNA.
- Surrounded by a nuclear membrane with pores.
- The nucleolus inside builds ribosomes.
- Most cells have exactly one.
- Red blood cells lose theirs to carry more oxygen.

LOOK FOR IT

Think of it as The office where the instructions are kept.

Present in both plant and animal cells.
