

# Household Conversions

Practical skills

Length, weight, volume, temperature and pressure — the everyday numbers.

*Rounded to what is useful rather than what is exact.*

| From              | To     | Multiply by           |
|-------------------|--------|-----------------------|
| <b>Inches</b>     | cm     | 2.54                  |
| <b>Feet</b>       | metres | 0.305                 |
| <b>Miles</b>      | km     | 1.609                 |
| <b>Pounds</b>     | kg     | 0.454                 |
| <b>Stone</b>      | kg     | 6.35                  |
| <b>UK pints</b>   | litres | 0.568                 |
| <b>US gallons</b> | litres | 3.785                 |
| <b>psi</b>        | bar    | 0.069                 |
| <b>°F → °C</b>    | —      | $(F - 32) \times 5/9$ |

Tyre pressures: 32 psi  $\approx$  2.2 bar. Check them cold — driving raises the reading.
