

Where Animals Live

Kindergarten

Ten animals and the home each one builds or finds.

Every animal needs shelter. Where it lives tells you a lot about how it lives.

Animal	Home	Made of
Bird	nest	twigs, moss, mud
Rabbit	burrow	a tunnel in the soil
Bee	hive	wax the bees make
Spider	web	silk from its body
Fox	den	a hollow under roots
Fish	reef or river	rocks and plants
Squirrel	drey	leaves high in a tree

Look up on your next walk. Nests are easiest to spot in winter.
