

Parenting Styles

Psychology

Baumrind's dimensions, and the outcomes associated with each.

Demandingness against responsiveness.

Style	Demand / Respond	Associated with
Authoritative	High / High	Best outcomes across measures
Authoritarian	High / Low	Compliance; lower self-esteem
Permissive	Low / High	Poor self-regulation
Neglectful	Low / Low	Poorest outcomes

These are correlations, not proven causes: child temperament also shapes parenting. The effect runs both ways.
