

Fast and Slow

Pre-Kindergarten

Speed, sorted into two piles a toddler can see.

FAST

- A cheetah running
- A racing car
- A bird flying
- A river rushing
- Running to the door

SLOW

- A snail
- A tortoise
- Honey pouring
- A cloud drifting
- Tiptoeing to bed

THE DIFFERENCE THAT MATTERS

Fast gets you there sooner. Slow lets you notice more. Both are useful.

Race a toy car against a rolling ball and say which was faster.
